RANNTA: Rebuilding Value on the TON Network

A Scalable, Secure, and Symbolic Token for the Future

▲ Introduction

RANNTA Coin (RANNTA) is a decentralized, community-powered token built on the scalable TON blockchain. It is more than just a digital asset — it carries a symbolic message rooted in the memory of the devastating Los Angeles fire.

RANNTA represents rebirth, resilience, and a return to glory — echoing the eternal call to "Make America Great Again."

Designed for speed, affordability, and security, RANNTA aims to be a tool for financial and spiritual revival in the decentralized era.

▲ Key Features

○ Ultra-fast Transactions: Powered by multi-threaded architecture and dynamic sharding in TON for near-instant settlements.
○ Minimal Fees: Optimized gas model ensures extremely low transaction costs — perfect for micropayments and staking.
○ High-Level Security: Backed by BFT consensus and robust smart contract infrastructure.
○ Limitless Scalability: Thousands of TPS make RANNTA ready for mass adoption.

▲ Tokenomics

Name: RANNTA Coin
Symbol: RANNTA
Blockchain: The Open Network (TON)
Decimals: 9
Total Supply: 130,000,000,000
Contract Address: EQBCY5Yj9G6VAQibTe6hz53j8vBNO234n0fzHUP3lUBBYbeR
Explorers: TONScan / Tonviewer

▲ Token Integrity

To protect the long-term value and trust of RANNTA holders, all administrative privileges have been permanently revoked from the token smart contract. This

ensures that the total supply is fixed and no additional tokens can ever be minted. The contract is immutable and fully decentralized — reinforcing RANNTA's commitment to fairness, scarcity, and symbolic integrity.

▲ Vision & Symbolism

RANNTA is not just a token — it is a resurrection. Born from the ashes of disaster, it transforms tragedy into purpose. It is a call to rise, to unite, and to govern ourselves with sovereignty and vision.

Encoded in ancient numerical frequencies and symbolic consciousness, RANNTA is more than money — it's a movement encrypted on the blockchain.

▲ Use Cases

○ DeFi: Swaps, staking, and liquidity pools within TON
○ NFT Payments: Purchase symbolic digital assets
○ Governance: On-chain voting in future dApps
○ Staking Rewards: Earn by long-term holding

▲ Roadmap

○ Phase 1 (May 2025): Token launch, website, NFT intro
○ Phase 2 (June 2025): Liquidity pool on TON
○ Phase 3 (August 2025): Listing on platforms
○ Phase 4: DAO, cross-chain features, advanced staking

▲ Our Commitment

RANNTA is committed to transparency, symbolic consistency, and sustainable growth. Built on decentralized ideals, it evolves with innovation, purpose, and its community.

▼ Problem Statement

○ Lack of Symbolic and Cultural Depth
○ Fragmentation of Digital Identity
○ Underutilized Token Utility in NFTs
○ Short-Term Vision of Projects
○ Absence of a Decentralized Mythos
○ Cultural Superficiality
○ Disconnection from Ancestral Wisdom
